24. Supplier Consent to Disclose Tender Pricing

By submitting this tender response, we agree, on behalf of the economic operator, to the disclosure of the tender submission, which includes pricing information, to the Central Purchasing Body and/or Contracting Authority.

25. Notes for Pricing

25.1. General Items and Notes

Capitalised terms not defined herein shall have the meaning given to them in the Instructions Document.

Economic operators are advised that the "Road Signs Bill of Quantities" consists of a list of Road Signs and Ancillaries with notional quantities.

Economic operators must fully complete the "Road Signs Bill of Quantities" section below, by entering a rate against all items to be priced. The rate provided will be automatically multiplied by the notional quantity to provide a total for that item. The totals for all items will be automatically added to calculate the Total Price.

The "Road Signs Bill of Quantities" will be used to establish the following:

(1) The award criteria for admittance to the Framework Agreement:

Tenders will be assessed on the Total Price and ranked in accordance with the criteria set out in the Instructions Document.

(2) Ceiling Rates:

The rates tendered for each item in the "Road Signs Bill of Quantities" will establish ceiling rates for the Framework Agreement. These ceiling rates shall be fixed as the maximum rates for these items over the initial 12 months of the Framework Agreement and may not be exceeded by the tenderer when tendering for works at Supplementary Request for Tender (sRFT) stage. Economic operators who submit responses to sRFTs may reduce the rates for these items but may not exceed them. After the initial 12 month period, the ceiling rates will not apply.

Note:

All items in the "Road Signs Bill of Quantities" must be priced. Failure by the economic operator to enter a rate for each item will result in the application being deemed non-compliant. The economic operator must provide price entries in euro only, to two decimal places. All rates must be exclusive of VAT. The economic operator must not use negative rates or zero rates. The economic operator must not use blank spaces, use the term 'nil', 'included' or dashes or the like.
